

Application Serial No.: 10/037,922
Amendment dated: July 3, 2006
Response to Office Action dated May 2, 2006

4

Remarks:

The specification has been amended to include sequence identifiers for sequences in the instant application which were inadvertently omitted. Included is a paper copy of the Sequence Listing that lists these sequences. The paper copy and the CRF as filed with the present application are now identical. As the sequences themselves were present in the application as filed (specifically in the CRF as well as general references in the specification), it is respectfully asserted that the paper Sequence Listing contains no new matter.

The present amendment overcomes the outstanding objection to the specification. Early reconsideration and the passing of this application into issuance are therefore respectfully requested. If the Patent Examiner believes that a telephone interview would expedite prosecution of this patent application, please call the undersigned at (206) 442-6627.

Respectfully submitted,

Michelle L. Lewis
